

# A SIMPLE TECH EXPERIMENT!

by

SARAH Michelle Brown

# TAKE A TECH STEP

***Hey VideoStar!***

It's time to make your videos look better.

**Now that you've gone through SIMPLE lighting + backdrops, it's time to put the two together.**

Remember, Rome was not built in a day, but each time you commit to taking a tech step, it's a win-win for you AND your videos.

Dive on in, and *get your learn on!*

And as always...

Dream up,

Sarah Michelle Brown  
Your Virtual Video Director

# MAD SCIENTIST TIME!

It's time for you to do some more video experiments!  
Grab that camera of yours and get ready for a lil stroll.

## INDOORS:

- Start in your home or office.
- Turn on your camera.
- Turn it to selfie mode, so you can see yourself.
- Say what time of day it is + the month.
- Say what the weather conditions are like outside.
- Go for a stroll through the space, approaching various windows.
- Head into your rooms with white walls + windows (if you have 'em).
- Search around for places with great indirect light and when you find lighting and backdrops you like, say them each out loud.

## NOW HEAD OUTSIDE (WEATHER PERMITTING):

- Out you go!
- You're looking for great spots that have indirect light.
- When you find 'em, again mention the time of day + the month (the sun moves throughout the day).
- Mention + show the weather conditions.

## BONUS:

- When you're out and about, *in general*, take note of the GREAT, COOL, INTERESTING archways, alleyways, pavilions and walls.
- You may use 'em for your shoots one day. :-)
